JAYDAN CHURCHILL – APPRENTICE CASE STUDY

Nineteen-year-old Jaydan Churchill is currently working as a Technician Grade 2, as part of his apprenticeship with Peter Brett Associates, an independent practice of engineers, planners, scientists, and economists delivering major development and infrastructure project. Activate Apprenticeships was the training provider, providing the apprenticeship programme, Sourcing the candidates and providing the training, to ensure it was a great experience – both for the apprentice and the employer.

Jaydan chose an apprenticeship because he felt it offered the best of both worlds, being able to continue his education, whilst earning a wage and gaining real job experience. He was also attracted by the location and benefits that his employer was able to provide. Throughout his apprenticeship, Jaydan has particularly enjoyed working with his colleagues and gaining new skills and experience along the way, especially related to design and quality skills.

Jaydan plans to continue with his education in the future, through to a Masters degree.

I have had the opportunity to strengthen my communication skills and my understanding of the design process. Doing an apprenticeship has worked well for me. It's been great to be able to work and learn at the same time, whilst still having the opportunities to travel, and being able to work towards my own goals.”
